-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This communication is responsive to the Pre-Amendment filed 1/13/2002.
2. Claims 1-54 are pending in this application. Claims 1, 11, 16, 18-20, 28, 36, 38, 40, 42, 45, 49 and 52 are independent claims. In the Pre-Amendment filed 1/13/02, claim 1 was canceled, and claims 45-54 were added.
3. Note, claims 2-10 depend on an independent claim that was canceled, and thus are not in a proper condition for examination.

Election/Restriction

4. Upon initial review of the claims it appears that claims 11-54 differ in subject matter and therefore require a different search. In accordance with this a restriction is deemed proper.
5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group I. Claims 11-15, drawn to a method for scrolling (e.g. spin dialing) menu items on a display for user selection, classified in Class 715, subclass 830.
 - Group II. Claims 16-17 and 42-44, drawn to an on-screen navigational control for traversing a 3D workspace, classified in Class 715, subclass 851.
 - Group III. Claim 18, drawn to a dynamic icon, classified in Class 715, subclass 977.
 - Group IV. Claim 19, drawn to a display screen, wherein there is tactile as well as visual interaction between a user and an operator interface, classified in Class 715, subclass 702.
 - Group V. Claims 20-35, drawn to a user interface, wherein a user has access to and control of a data processing system or component at a location removed from the user, classified in Class 715, subclass 740.

Group VI. Claims 36-41, drawn to a translucency/transparency interface element, wherein the relative transparency of an interface element may be modified, classified in Class 715, subclass 768.

Group VII. Claims 45-54, drawn to subject matter wherein a user's interaction with a computer system is used to control the presentation of display data, classified in Class 715, subclass 700.

6. The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, while Invention I has separate utility such as providing a rotatable circular object list from which a user could choose objects, Invention II is directed to a navigatable spaces in which a user may traverse by selecting portals, Invention III involves with an animated multipurpose icon, Invention IV is directed towards a touch screen which senses a finger placed on the screen and determines a location of said finger thereon, Invention V is directed to a method for controlling a remote device, wherein a GUI being displayed and associated with a remote device, Invention VI is directed to a method of copying an object in a GUI, wherein a ghost image drawn in muted colors is being used, and Invention VII is drawn to a method of providing an interactive display, wherein communication reply timer and errors are being monitored. See MPEP § 806.05(d).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter,

Art Unit: 2174

and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
